BB00.40-P-0224-01A	Viscosity classes of engine oils (car engines)	Passenger vehicle engines (BR 100, BR 200, BR 600) Commercial vehicle engines from the passenger vehicle sector (BR 100, BR 200, BR 600) Industrial engines from the passenger vehicle sector (BR 100, BR 200, BR 600)	Sheet 224.1

A precise application of the SAE grades in accordance with ambient air temperatures would require more frequent engine-oil changes. The temperature limits for the SAE grades should therefore be regarded as guidelines, which can be exceeded or undercut for a short duration.
